HOW WE COMPARE

Paraben **FREE**

Endocrine disrupting chemicals linked to reproductive issues and cancer.

DMDM Hydantoin **FREE**

A preservative that works by releasing formaldehyde. Formaldehyde is classified as a human carcinogen by the International Agency for Research on Cancer (IARC).

Sodium Lauryl Sulfate **FREE**

Skin irritant found in many household cleaning products.

Lanolin Alcohol **FREE**

Traces of cancer-causing pesticides in lanolin, an ointment base derived from sheep wool.
